Experience

- **Arihant Capital Markets Ltd.** *Jun. 2026 - Aug. 2026*
  Frontend Developer Intern (Flutter & React), Indore *Certificate (Rating: 9/10)*
  – Developed the Flutter client of **Goal Planner**, a goal-based mutual fund investing app, using Riverpod.
  – Built risk profiling, goal creation, corpus projection, fund recommendation and Finfactor holdings import flows.
  – Built a React **Equity Fund Scoring Dashboard** ranking 1,300+ Indian equity funds on 13 parameters.
  – Built the React frontend of a RAG-based **Finance Research Chatbot** over research PDFs and live market data.

- **PRIUS Fellowship** *Feb. 2025 - Aug. 2025*
  Undergraduate Research Fellow, IIT Indore *Office Memorandum*
  – Built a Python (EAZY-py) pipeline to estimate photometric redshifts of COSMOS galaxies by SED fitting.
  – Tuned fitting parameters and generated UVJ diagrams to classify galaxies as star-forming or passive.

Projects

- **B.Tech Project: Solar Wind & CME Visualization** *GitHub*
  – Built a Python pipeline (OpenVDB, Blender) rendering 201 MHD snapshots into 804 4K 360° frames.
  – Built a three.js web dashboard to play, scrub and compare the 360° renders across the four viewpoints.
  – Built a Python render service (SQLite job queue) so an uploaded .vtk file returns frames on the dashboard.
  – Built a Unity VR app for Meta Quest 3 with thumbstick viewpoint switching, playback controls and haptics.

- **Nityakram (A Routine & Habit Tracker)** *Link, GitHub*
  – Built a MERN app to track routines, habits and expenses, with XP, streak and daily-penalty gamification.
  – Implemented JWT access/refresh auth, Joi validation, rate-limited auth routes and email password reset.
  – Added a nightly cron job for streak penalties; deployed on Vercel (client), Render (API) and MongoDB Atlas.

- **Auction Hub (Cricket Player Auction Platform)** *GitHub*
  – Built a cricket auction platform (Node.js, Express, MongoDB) used to run a live 8-team, 100-player auction.
  – Built an auctioneer control panel and live projector display synced over Socket.IO, with bid and sale undo.
  – Wrote unit-tested bid rules: slab increments, category caps and a purse cap so every team fills its squad.

- **Immersive 3D Portfolio (Space-Themed)** *Link, GitHub*
  – Developed a space-themed interactive 3D portfolio using React Three Fiber and Three.js, deployed on Vercel.
  – Added free-flight ship piloting, a star map for wormhole jumps and a plain website view with URL routing.
  – Reduced load time using Draco compression for 3D models, lazy loading of heavy assets and code splitting.
